

At the heart of QuikWall is the patented node-and-dogbone quick interlocking mechanism. It makes connecting QuikWall panels quick, easy and results in a tight, strong connection.

QuikWall
Custom Modular Components

QuikWall Custom Modular Components

QuikWall is an innovative display panel that is easily modified to your client's design specifications. The engineered panels are comprised of a lightweight 1.5-inch wide aluminum welded frame and patented quick interlocking node-and-dogbone mechanism. QuikWall panels can be fabricated in almost any size or shape and finished with an infinite selection of coverings. The resulting reversible QuikWall panels are lightweight, versatile, sturdy and highly functional. Assembling QuikWall panels into a complete display is quick and easy, creating a dynamic exhibit that is cost-effective, beautiful and very easy to transport and install.

QuikWall is the Smart, Versatile Solution

Simple Ideas Are Elegant Ideas The patented QuikWall system consists of custom wall components with compelling modular features. It's an opportunity for you – the exhibit builder – to better serve your custom display client while saving both time and money through lower weight and faster setup.

Ultimate Flexibility Specify any height. Specify any footprint or radius. Choose from any finish. Use different coverings on opposite sides of panels. Use any standard or custom display hardware. Add lighting and shelves. Put QuikWall to the test. If you can imagine it, we can create it.

Proven, Functional Panels

QuikWall, Quick Assembly

Connecting one panel to another takes just moments. Utilizing QuikWall's patented interlocking node-and-dogbone mechanism, one panel is lifted slightly to insert its nodes into the corresponding dogbone slots in the preceding panel. The panels are lightweight enough (approx. 37 lbs.) to be easily handled by a single person.

Inner Strength

QuikWall panels are made of a welded aluminum frame with lightweight filler, covered with any number of materials and colors. During booth setup, QuikWall connectors naturally form tight, strong joints, making a structurally sound finished display.

Easy Transformation

QuikWall offers amazing versatility. A very large exhibit booth can quickly and easily break down into a smaller display area. A square exhibit can turn into an inline display. QuikWall displays are infinitely configurable.

Lives Long, Stays Strong

When design updates are needed, simply replace the panel coverings with new materials and finishes. QuikWall's lightweight rigid aluminum frame has such structural integrity that there's almost never a need to replace it. And QuikWall's modular design makes it easy to add panels and grow with your client's exhibitry needs.

Fast, Easy Setup

Under 20 minutes to setup QuikWall panels!

Savings on Every Level

Time is Money

QuikWall is so light (50% less weight than a standard panel) that panels and accessory components can be moved easily and quickly. A QuikWall exhibit can be assembled and disassembled in a fraction of the time it takes competitive wall systems, saving on labor costs.

Thin is In

The slender QuikWall panels travel securely and compactly in open stack frames with no need for expensive crates. QuikWall's thin 1-1/2-inch profile allows for as much as 50% more display to be contained in the same space as conventional displays occupy.

Less Weight, Less Freight

Lightweight QuikWall has proven to save on weight-related handling, including freight and drayage. Imagine the savings accumulated with an entire exhibit program.

More Than Just Exhibits

Endless Possibilities

As you can see, QuikWall is perfect for almost any exhibit you can imagine. But, we don't stop there. What other uses can easy-to-assemble, easy-to-carry, easy-to-store wall systems have for your clients? Imagine the uses for quick retail displays, re-configuring office space, or even creating designated display areas in museums or public spaces. Anywhere, everywhere, QuikWall can be an inexpensive, flexible display solution.

Choose QuikWall

QuikWall is infinitely versatile and easy to work with. The savings QuikWall creates for your clients in their exhibit budgets can be used to pay for upgrades, larger exhibits or permit them to exhibit in more shows.

Accessorize QuikWall

Corners

Dividers

Stabilizers

Decorative Trim

Lighting

Shelving

Whether it's custom trim or mounting plasma TVs, QuikWall can solve the most demanding challenges with endless accessory options.
